

Perry Johnson Registrar's **QUALITY POLICY STATEMENT**

Through a strategy of continuous improvement and teamwork, and in accordance with the requirements set forth by the international standards organizations, Perry Johnson Registrars, Inc. is dedicated to differentiating itself as an effective provider of certification services, as well as ensuring that we create value for our customers, industry stakeholders, and employees.

The foundation for achieving our objective is based upon our commitment to provide our clients with the highest level of service to assist with their success in the global marketplace.

PJR understands the importance of impartiality in carrying out its management system certification activities, manages conflict of interest, and ensures the objectivity of its management certification activities. PJR further supports a policy of public access and disclosure of information regarding its certification processes and status of certified organizations, and is responsive to complaints about its activities and the activities of its certified clients.

The entire PJR team adheres to the spirit of this quality policy as well as the directives of the Quality Manual and its subordinate documents.

CE MARKING

PRESSURE EQUIPMENT

Perry Johnson Registrars, Inc.

Your Solution for CE Marking

CE Marking – The Gateway to Europe

Adopted in 1985, the CE (Conformité Européenne) mark is a European certification mark indicating that a product complies with the essential European health, safety, and environmental requirements set out in the European directives. Since the CE mark was developed, products no longer need to adapt to the specific requirements of the different member states of the European Economic Area (EEA). The CE mark provides assurance to all EEA countries that a product is safe. Determining whether your product requires this mark is vital for manufacturers who export products throughout the 27+ countries of the EEA.

In order to obtain the CE mark, a product needs to be assessed according to EU regulations, and must pass the relevant product tests (as guided by the directives and the related standards) in order to ensure that it is safe for consumer use.

Whether you are a large company developing new products, or a smaller organization ready to expand your market share, becoming familiar with the applicable EU directives for your unique product and understanding the CE marking process is crucial for tapping the vast potential of the European Union market.

Is My Product Considered Pressure Equipment?

The Pressure Equipment directive (97/23/EC – also known as PED) and the related directive – Simple Pressure Vessels (87/404/EEC), refer to a large group of products, which must be assessed properly to determine how best to apply the regulations.

“The directive concerns items such as vessels, pressurized storage containers, heat exchangers, steam generators, boilers, industrial piping, safety devices and pressure accessories. Such pressure equipment is widely used in the process industries (oil & gas, chemical, pharmaceutical, plastics and rubber and the food and beverage industry), high temperature process industry (glass, paper and board), energy production and in the supply of utilities, heating, air conditioning and gas storage and transportation.”

(European Commission, ec.europa.eu)

In order to adequately determine the correct classification, our technical advisors carefully review these directives as they apply to your unique product. The PED directive also indicates when the welders and welds need to have additional certifications (such as WPS and WPQR) in order to achieve the CE marking. We also provide these certifications as part of our full-service approach to assist you in achieving access to the European market.

PJR and Szutest are committed to simplifying the entire process of CE marking. Please contact us for more information about getting the CE mark on your product.

PJR and SZUTEST Unite to Bring You CE Marking Services

PJR and Szutest have a memorandum of understanding; a contractual agreement to deliver CE marking services to manufacturers of products that are exported to the European Union. This unique partnership brings two powerful market leaders together, thereby providing you with the highest level of service and quality.

Our alliance means that you benefit from PJR's established track record of customer service and experience in Management Systems, matched with the skill and superior technical expertise in CE marking from the most dynamic Notified Body in Europe.

History of PJR

Founded in 1994, Perry Johnson Registrars, Inc. is an industry leader in the Management Systems certification market. PJR is a full-service registrar that has offices in more than seven countries including: the U.S., Japan, Italy, Mexico, China, Thailand and India. PJR maintains accreditations from ANAB, UKAS, EMA, INMETRO, JAB and SINCERT. PJR's accreditations cover almost all sectoral scopes. PJR is also recognized by the IATF for ISO/TS 16949:2009.

Headquartered in Troy, Michigan, with auditors in the U.S. and across the globe, the company provides independent, 3rd-party management system audits to a variety of standards. PJR has a large and diverse client base that includes many globally recognized companies.

History of SZUTEST

Szutest was established as the official representative of the largest Czech Republic testing body (SZU), and one of the European Notified Bodies with the largest scopes of accreditation. Szutest and its team of young and dynamic engineers now provide assessment and testing services as an accredited European Notified Body (N.B. #2195). Szutest's specialists have provided services as an accredited test and calibration laboratory for more than 53 years.
