Health & Safety Management Systems Registration

OHSAS 18001:2007

OHSAS 18001 is an international Occupational Health and Safety Management System Standard developed by the British Standards Institution (BSI).

This standard is based on the management system model that is already implemented by organizations worldwide. (i.e. ISO 9001 and ISO 14001)

OHSAS 18001 ensures that organizations establish minimum requirements for health and safety best management practices.

Purpose of OHSAS 18001

- Provide organizations with the requirements and framework to implement an effective health & Safety Management System.
- Provide a systematic approach to assess risks and implement best management practices.

An OHS management system helps organizations prevent workplace accidents and workplace-caused illness.

PJR's Approach to OHSAS 18001

Our process performance approach (PPA) to auditing has our top industry experienced auditors taking your system to the next level.

- Fair
- Impartial
- Rigorous
- Courteous

Benefits of OHSAS 18001

- Minimize risks, injuries and death to employees and others.
- Improve working conditions for employees and others.
- Identify hazards and implement proper controls.
- Improve business performance.
- Helps reduce unnecessary costs while increasing productivity and improving product quality.
- Assist organizations in establishing a responsible image within the marketplace.
- Help meet legal and regulatory requirements.
- Worldwide credibility for health and safety performance.
- Easily integrated with other standards (i.e. ISO 14001).
